

Customer Testimonials

"I just wanted to state again what a great job you all did with this content and turning it into a virtual session. I have to admit that I was a little skeptical about flow, engagement, sharing and the Go & See approach. You all, along with a great host, did a great job. Other than the virtual walk on the floor this felt very similar to other sessions I have taken with GBMP face to face. I was really impressed with the ability for the conversation to happen freely with large and small group activities and the use of Zoom and the breakout rooms. This approach will obviously open up easier access to your content by reducing travel challenges (time away from work and family responsibilities) as well as the ability to respond quicker to demand/need for additional workshops. Obviously virtual floor walks are tough and challenging but you and the team made that a positive experience for the participants. Great job with this and I look forward to attending 2 more sessions over the next month (CI and Systems) and will keep an eye out for Build Excellence. Thanks again for a great experience."

-Bryan Reed, Liberty Mutual

"Impressive facilitation of the virtual workshop. Thank you for continuing to help us mature and learn." - attendee Shingo Systems Design Course

"We too, have enjoyed the Shingo training that your team has facilitated and the mere fact that you were able to re-pivot the training virtually has been valuable to our Liberty Mutual Process Excellence team. Our 'Go-See' was very enlightening given the passion that the team members from OC Tanner was able to express and share their answers. The virtual activity was very well done. Enjoyed how our host accommodated this new approach. I wanted to audit this class given that its virtual and hoping to provide feedback to Liberty Mutual. I really enjoyed this class so I'm encouraging our PE Team members to start signing up for the virtual classes."

-Gerry Velasco, Liberty Mutual

"Excellent workshop. I have learned concepts that will be very helpful in the process of strategic planning that my program has started."

"I'm happy to report that I learned a handful of tactics that I can put to use immediately. "
-Jose Ibarra, CommCorp. - Problem Solving workshop

"Obviously moving on-line was big change in the middle of the program. However, the technology was better than expected" - Lean Certificate Course attendee "Very informative. Glad I was able to rally our group here at FedEx at the last minute and get it done. We're in the Process
Improvement office and we're always looking for a new perspective, and an opportunity to hone our skills, since we're all stuck at home.

You covered a lot of material in four hours, but kept it interesting. Thanks!"

"Part of our interest was to see how effective teaching this material online would be. We have several classes we teach (including a new A3 class) but they are all very "hands on". We all remarked how we liked the break out rooms, and the interaction. You've given us hope that we do this in a similar setting!"

"I really enjoyed the workshop this week. Thank you for all the prep and creativity to make sure the content could come to life even in a virtual environment. I had a lot of good personal takeaways and am excited to present to my team and develop our system maps. Thanks!" - Justin Corbridge, Aquity Business Systems

"The interactive components of the workshop helped to keep us engaged and break up the day. The videos helped too."
